Technical Skills

Languages: HTML, CSS, SQL, Python (Numpy, Pandas, OpenCV, Tkinter).

Concepts: DBMS, OOPS, Networking Essentials.

Tools: PyCharm, VS Code, Jupyter Notebook, MySQL Workbench, XAMPP, Power BI, GitHub.

Training

Trainee At Bytes and Cookies Technologies (On- Site)

Duration: Sep 2025 - Present

Project: Python-Based Academic Chatbot

- Worked on a Python-based chatbot for Renaissance Law College that assists students by answering academic queries based on course chapter content.
- Converted PDF-based study materials into structured JSON data for efficient search and retrieval.
- Implemented query-matching logic to return the top 3 most relevant results per student query.
- Integrated REST APIs and MySQL to manage chatbot responses and store student query history.
- Collaborated with senior developers to debug backend logic, optimize performance, and support deployment.
- **Technologies Used:** Python, Html, CSS, MySQL, REST APIs

Project: Sahyog – Donation Management Platform

- Worked on Sahyog, a role-based web platform supporting beneficiary, donor, and admin workflows using Python.
- Implemented beneficiary profile submission and verification flow, including one-time submission, admin approval/rejection, and status tracking.
- Developed donation request management logic, enabling admin review and controlled forwarding of requests to donors.
- Built donor decision workflows, including approve, reject, and split-donation functionality across multiple donors.
- Implemented admin management features to oversee all Sahyog requests, manage beneficiary profiles, create and manage donor profiles, monitor donor–beneficiary interactions, approve/reject requests, and close requests at final resolution.
- **Technologies Used:** Python, HTML, CSS, JavaScript, Bootstrap, MySQL, REST APIs, XAMPP

Academic Projects

Face Track – Face Recognition Attendance System | [GitHub](#)

Duration: 3 Weeks

- **Description:** AI-powered system that automates student attendance using real-time facial recognition
- **Technologies Used:** Python, OpenCV, Tkinter, MySQL
- Marked attendance via webcam and saved records in the database automatically

Sales Insights Dashboard | [GitHub](#)

Duration: 2 Weeks

- **Description:** Power BI dashboard providing real-time sales and market performance insights
- **Technologies Used:** Python, Power BI, MySQL
- Helped stakeholders identify trends and support strategic decision-making

Voice Assistant – ALEX | [GitHub](#)

Duration: 2 Weeks

- **Description:** Python-based voice assistant that executes user commands through voice interaction
- **Technologies Used:** Python, Speech Recognition, Pytsx3
- Enabled voice-based searching, system control, and query execution

Education

RGPV, Acropolis Institute of Technology and Research, Indore, M.P.

Duration: 2021 – 2025

- B. Tech in Computer Science and Engineering
- CGPA: 8.10/10

CBSE, Lokmanya Vidya Niketan, Indore, M.P.

- Senior Secondary (10+2) | PCM | 81.6%
- High School (10th) | 75.8%

Duration: 2020 – 2021

Duration: 2018 – 2019

Achievements and Certificates

- NPTEL DBMS Certification (Elite Rank)
- Deloitte Data Analytics Virtual Job Simulation (Verified)
- Python Certification – Google Developer Group (GDG)
- Cisco Networking Essentials Certification
- Conducted an HTML Workshop for a Govt. School as part of the Village Connect Program
